Simple Macro Recording and playback utility. Easily record keyboard shortcuts (macros) using arbitrary keystrokes and on any text box or selected text on the screen. KeyMacro can be used to record the keyboard shortcuts for various applications such as: Internet Explorer, Firefox, Chrome, Windows explorer, Paint, Notepad, Windows calculator etc. It also has an option to save the macro to file. Simply start the program, record a macro and press the stop button and the macro is saved. When you press the replay button, the macro is played back on the text box or selected text on the screen. Use your shortcut keys to replay the macro. To edit the recorded keystrokes simply press the Edit button. Macro Keystrokes: Create a macro from left to right: Select a keyboard shortcut in the list from left to right. When you select a shortcut key, the item is highlighted in the list. For each item you select, a message is displayed to inform you that the item is selected. To create a macro from right to left: Right click on the text box or selected text. The menu pops up and there is a menu option, Create a macro. You can also delete the selected macro from the list by using the Delete button You can save your macro by clicking on the Save button. You can also load the macro by clicking on the Load button. When you are ready to stop recording a macro, click on the Stop button. When you are ready to start playback, click on the Play button. You can now select any item from the list to replay the macro. To edit the recorded keystrokes, click on the Edit button. To exit, click on the Close button. Hotkeys: You can use your keyboard to perform the functions listed below: Keyboard Shortcut: Description: Windows Explorer: R, Enter key to select the item in the file explorer. P, Enter key to open the file. L, Enter key to open the items in the file. I, Enter key to open the details in the file. S, Enter key to save the items in the file. B, Enter key to open the file in the browser. E, Enter key to open the items in the file in the browser. F, Enter key to open the details in the file in the browser. F5, Refresh the page. D, Enter key to exit <https://monarchcovecondos.com/advert/iso-anna/>
