“In FIFA 22, we’ve made the move towards making the player even more responsive and natural in how they move,” says Andrew Olivieri, Senior Producer at EA Sports. “Now, we’ve partnered up with our technology development team, who are the experts at working with real-life athletes, to bring the game to a whole new level of fidelity. Our players are now more reactive, reactive in the way that they move their bodies and react to challenges in the game. But, this is still football. It’s still skill, it’s still actions, it’s still tackling. These are all aspects of the game that matter, and what we’re doing is enhancing that.” Players will notice enhanced visuals and realistic animations as FIFA’s new motion-capture system is used across the board, from animation tweaks to game physics and the ball. Additionally, player models have been refined, with new markings applied to players to create a greater visual connection. On the field, Real Player Motion technology, which has been used by EA Sports on Madden and NHL titles, will help animate in-game shots, passes and dribbles more fluidly, resulting in more realistic on-field animations.

Despite providing a number of new gameplay features and enhancements, FIFA 22 will play like an evolution of FIFA 21, with everything needed to help players get into the game, find out who they are on the pitch, and play through their first match. “FIFA has a huge following,” says Olivieri. “Players all over the world want to play on FIFA. We have a huge community of players who want to continue playing in FIFA. One of the main goals for FIFA is to

ensure that we can bring more people into the game. We're able to do that with the tech we're providing on FIFA 22 - it's a start to a great journey." Players will have the opportunity to test drive the new FIFA 22 features in "The Journey," a new free-to-play game mode that lets players hop into the shoes of either a team's goalkeeper or a defender, depending on whether they own FIFA Ultimate Team or not, and compete in a number of new challenges, featuring revamped action from the likes of Lionel Messi and Cristiano Ronaldo, as well as major design changes such as a more open and

What's new:

- **Four competitions including the Africa Cup of Nations and two World Football Leagues:** created by ourselves and our partners, with new branding, graphics and better-feeling stadiums. New additions include *Egypt 2016, England 2016, England 2017, Holland 2017, Germany 2017, Italy 2017*
- ***Career Mission Goals*** - achieve the most progressive scoring goals in the game by completing your team's five-star Player Rating goal System. You can even gain these goals by completing your Career Mode goals. You can purchase as many FREE goals as you want on the Pro Pack or in Ultimate Team - or you can start as a beginner and make your way up by levelling up in Career Mode.
- **New World Classis** - create your greatest team of players in *FIFA Franchise mode* and use them in Career mode for "The Journey of your Pro." Build your powerful squad from free agents and millions of leagues players around the world, including more than 12,000 current football players. Create a team to become the best team in the world.
- **Football Entities** - The Football Entities will provide access to more realistic player traits. You will be able to assign player behaviours and traits to interact with your team and build your football league. You can manipulate player effort levels, transfers, training and game intelligence.
- **Player Health** - a long-standing issue in FIFA is solved with the introduction of Biomechanics. The new biomechanics add-on from EA SPORTS partners MEDSA will provide players with enhanced in-game player balance and more realistic acceleration and kicking during gameplay. You will be able to analyse your body and make better passes in certain situations in real-time, which will ensure in-game player speed and stamina are more realistic. Players can enjoy closer battles in the air, as they will be able to slow down during powerful tackles.
